BACKGROUND

Software Engineer with 4+ years of experience designing automation frameworks, developing full-stack applications, and building scalable testing solutions. Proficient in Java, Python, JavaScript, TypeScript, React, Selenium, Playwright, GraphQL, and AWS, with experience developing backend services, implementing CI/CD pipelines, and delivering high-quality software in Agile environments.

TECHNICAL SKILLS

Languages: Java, Python, C#, JavaScript, TypeScript, React, Node.js
Automation: Selenium WebDriver, Playwright, Pytest, Postman, GraphQL
Testing: UI Automation, API Automation, End-to-End Testing, Regression Testing, Smoke & Sanity Testing, Manual Testing, Test Case Design, Defect Tracking
Tools & CI/CD: Git, GitHub, GitHub Actions, Harness, Jira
Methodologies: Agile (Scrum), SDLC, Cross-Functional Collaboration, Production Releases

EXPERIENCE

LIVEVIEW TECHNOLOGIES
Apr 2026 – Oct 2026
SOFTWARE TEST ENGINEER
American Fork, Utah

- Developing backend and frontend automation using Pytest(GraphQL & Postman) and Playwright(Typescript)
- Validating software and hardware on live units to ensure quality and end-to-end functionality.
- Managing production releases across frontend and backend services.
- Leading feature level test plans and executing test suites.
- Working with CI/CD Pipelines to ensure adequate Smoke and Regression runs across the product.

COX AUTOMOTIVE
Sep 2022 – Aug 2025
SOFTWARE TEST ENGINEER
Draper, Utah

- Designed and built a Selenium/Java automation framework from scratch, reducing manual regression testing from approximately 400 test cases to 25 automated end-to-end scenarios.
- Implemented GitHub Actions and Harness CI/CD pipelines for scheduled automation execution, monitoring failures, and maintaining framework stability.
- Automated backend API validation using Postman to improve regression coverage.
- Mentored new QA engineers and partnered with developers to expand automated test coverage.
- Created test cases, performed manual testing, and automated high-value test scenarios.
- Collaborated with cross-functional Agile teams to deliver high-quality software releases.

PROJECTS

Job-Tracker.io | React, JavaScript, AWS Lambda, API Gateway, DynamoDB, Cloudflare

- Designed and developed a full-stack web application for managing and tracking job applications.
- Built a responsive React frontend integrated with serverless AWS services through REST APIs.
- Developed backend functionality using AWS Lambda and DynamoDB, deploying the application through Cloudflare.

EDUCATION

- **B.S. Software Engineering**
  Neumont University • GPA: 3.65
